ABOUT ME

Software engineer focused on Front-End web development and agile methodologies for development, I am always interested in finding efficient solutions through the analysis of new technological tools that emerge. I strive to maintain a practical approach and develop ideas into viable solutions.

WORK EXPERIENCE

2022 - Completed (Contractor | 6 months) | Front-End Developer at Boyants Group LLC

Improve and optimize resources for the performance of the previous website of the company, I also managed to design a small System-Design for the new platform to be developed and contributed in the analysis to manage the initial architecture of the Front-End. Technologies used: JavaScript, Php, Mysql, Html, Css, Bootstrap, Jira, Trello.

2022 - Completed (Volunteer | 3 months) Team Leader at OpenBootCamp.

I collaborate on a voluntary basis via Discord in the initiative called (Open-Week-Apps) as Team Leader for small applications that take place during 3 - 4 days in order that OB students can put into practice their knowledge and experience of teamwork. Technologies used: Git, Github Issues, React, TypeScript, Tailwind CSS, Bootstrap.

2021 - Finished : Analyst and Front-End intern at Bamapit Agrosoft.

I attended throughout the internship and was able to do requirements debugging, research and suggestions on design ideas for the web and mobile interface. I was able to create a prototype by giving design ideas and then pass it to code. Technologies used: AdobeXD, Figma, Html, Css, Javascript

5/1/2021 - Corporate volunteering - En Lata Santo Domingo.

The volunteering lasted 3 days in which I managed to develop with my team an innovative proposal focused on the area of technology for the health sector and win the first place against several teams. Used: Critical thinking, analysis, figma.
